

Mechanical

related to the vibrations of an electrical charge or magnetic field that produces electromagnetic waves that can travel through a vacuum such as space.

Sound

related to the motion of atoms or molecules in a substance.

Chemical

related to the movement of objects or its position in gravity

Radiant / Light

related to the potential energy stored in bonds between particles in the nucleus of an atom

Electrical

related to the potential energy stored in the bonds between atoms in a compound.

Thermal / Heat

related to the movement or flow of electrons which carry a charge.

Nuclear

relates to the repetitive compression (squeezing) and rarefaction (letting out) of molecules in a substance (solid, liquid, gas).
